

N O T I C E

Curriculum Practical Training (CPT) Rules

To All Graduate Students:

Please note that the CPT is approved only for those graduate students who met the following requirements:

1. The student must have completed all course requirements and made significant progress on the thesis/project. An acceptable draft of the thesis/project should be submitted to the advisor. The Graduate Chairman will review the draft before signing the CPT papers.
2. The student must be committed to returning to the program of study after the CPT (within a maximum of 1 year) and make progress towards completing the program of study during the year by spending some time on the research and/or writing/correcting the thesis document.

In the event a student does not make reasonable progress in completing the program of study (as determined by the Graduate Committee) within one year after obtaining the CPT, the Graduate Committee, in consultation with the advisor, will initiate steps to drop the student from the program.
